# Variables Description

Dataset contains 299 variable(s)

## File : house2015

### # uqnr: Unique Household Identifier

<b>Information</b>	[Type= discrete] [Format=character] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=21601 / 15307482.661 ] [Invalid=0 / 0 ]
<b>Notes</b>	This is the unique household identifier, which can be used to link data from this file with data for the same household from other files

### # personnr: Person (respondent) number within Household

<b>Information</b>	[Type= discrete] [Format=character] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=21601 / 15307482.661 ] [Invalid=0 / 0 ]
<b>Notes</b>	The two fields above (unique number and person number) create a 20-digit unique person identifier, which can be used to link data from this file with data for the same individuals from other files.

### # Q51MainD: Main dwelling

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-12] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=21601 / 15307482.661 ] [Invalid=0 / 0 ]
<b>Universe</b>	All households in the selected dwelling units.
<b>Notes</b>	This question is about the dwelling that the household occupies. The interest is in the main house and it also considers the other dwelling(s) if there is more than one structure that belongs to the household. The instruction to the enumerator is to make sure the respondent understands the kind of information requested. For example, the other dwelling cannot exist without the main dwelling, while the latter can exist without the former. For any other material used that is not specified in the given categories, provision is made in Code 12 (Other) to complete the required information. There should be only one mark for each category.

# Q528aMains: Connection to MAINS electricity supply					
<b>Information</b>		[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]			
<b>Statistics [NW/ W]</b>		[Valid=21601 / 15307482.661 ] [Invalid=0 / 0 ]			
<b>Universe</b>		All households in the selected dwelling units.			
<b>Notes</b>		'Mains electricity' refers to cases whereby electricity is supplied by companies like Eskom and other local ones such as municipalities. This means that the electricity from a generator and other devices is not part of the mains supply. The purpose of this question is to find out how many households have access/a connection to the mains electricity supply, the reason being that some households, as much as they have access to it, may not be using it as the main source of energy.

<b>Notes</b>		This question is applicable to all households, and the purpose is to establish whether any children aged between 5 and 17 years in the household had left their households to live on the streets in the past 12 months. The enumerator is instructed to be cautious about various circumstances. For example, if members of the household know that their child/children are living on the street, the answer should be 'Yes', but if they do not know where they are, the answer should be 'Don't know'. There should not be any form of assumption that any child who is not at home is living on the streets. Suggestion: In the past 12 months, was there any young person aged 5-17 years, who has left this household, and you do not know his/her whereabouts or whether he/she lives on the street?

Information		[Type= discrete] [Format=numeric] [Range= 1-10] [Missing=*]		
Statistics [NW/ W]		[Valid=21601 / 15307482.661 ] [Invalid=0 / 0 ]		
Universe		All households in the selected dwelling units.		
Notes		This derived variable measures access to assets by households. This variable is based on the questions and formulas used by the South African Advertising Research Foundation (SAARF), but it might differ with GHS since those questions were asked to households not individuals, and calculated for all households, not for individual respondents aged 16 years and older. There are ten categories on the final code list, where one represents lowest access and ten represents highest access to assets.
